Intellectual Property
Research Institute of Australia

Annual Report 2007 - 2008

Research Expertise

ipria's expertise spans the broadest definition of intellectual property, covering issues relating to knowledge, personnel and intangible assets in addition to those associated with formal intellectual property rights, such as patents, trade marks and copyright. Its research examines issues associated with the creation, management and exploitation of intellectual property for both commercial gain and public good. ipria is a multidisciplinary centre which aims to:

- Support the development of world's best practice public policy in relation to issues associated with the creation, protection, management, exploitation and enforcement of intellectual property rights
- Improve the ability of Australian organisations to protect, manage and exploit intellectual property
- Contribute to the ongoing public debate in Australia about intellectual property issues and related matters, including innovation policy and economic growth, from an informed perspective

The Institute's research portfolio can be categorised under the following broad themes:

Enforcement of IP: examines issues related to the enforcement and protection of IP both in Australia and overseas.

The Use of IP by Business and Other Entities: focuses on intra-organisational issues relating to IP creation, protection and exploitation. Projects cover a wide range of issues from internal management of IP assets to strategies for maximising value and access to IP.

The Role of IP in Facilitating Innovation and Knowledge Transfer: investigates inter-organisational effects of IP with a particular emphasis on the transfer of knowledge and IP. Projects in this theme explore issues associated with broader definitions of IP.

The International Scope of IP Protection and its Impact on Trade and Knowledge Flows: examines the influence of the international IP system and markets on trade and knowledge flows. Projects in this theme consider, for example, how IP policies influence the free trade agreements.

The Responsiveness and Effectiveness of the IP System:

– **Examination and Innovator Engagement:** focuses on the IP rights system and ways of improving it.

Understanding IP: current research projects under this theme consider the history of Australian patent policy and patent attorney privilege.

Within these themes ipria's core staff have specialist expertise in:

- Intangible asset measurement, management and reporting
- Information technology law
- Organisation of innovative activity
- Copyright, patent and trademark law
- Competitive effects of, and strategy for, IP
- Drivers of national innovation
- Relationship between firm productivity and innovation
- Role of spillovers
- Appropriability of intellectual property

Resources

People

ipria's primary resource is its excellent personnel, which includes many outstanding researchers of international repute.

The management team of **ipria** comprises the Director, two Associate Directors, the Executive Officer and the Administrative Officer. The Director and Associate Directors provide the leadership of the Institute's research program.

In addition to its core research staff, **ipria** supports the work of, or collaborates with, an impressive network of associated researchers. These Research Associates are affiliated with leading universities in Australia, the United Kingdom and the United States.

ipria is assisted in achieving its mission by an Advisory Board and an International Board of Assessors. The Advisory Board's membership is drawn from industry, business, government, the professions, and the academy. The International Board of Assessors contains leading intellectual property researchers from around the world.

During the course of the year **ipria** played host to a number of visiting fellows for research and event purposes:

- **Mr. Marco Antonio Albuquerque de Araújo Lima**
- Director of Institutional Partnerships and Technological Information
- **Mrs. Rita de Cassia Pinheiro Machado** - Deputy Director of Institutional Partnerships and Technical Information, and Coordinator of INPI's Academy
- **Mr. Araken Alves de Lima** - Coordinator of the INPI's Academy Mastering Program on Intellectual Property

Financial Position

ipria was established in 2002 with foundation funding from the Commonwealth of Australia through IP Australia, the University of Melbourne and the State of Victoria. Following the successful 2005 Review the University of Melbourne and IP Australia have agreed to provide core funding for another four years. In addition to its core funding, ipria obtains financial resources from research funding bodies and various stakeholders. Those financial resources support specific research projects.
